

Experiment guide

Requirements

- To use Google Chrome.
- To install *Task Timer* extension. (<https://chrome.google.com/webstore/detail/task-timer/ilodecgofagpdifoghkggnaohndgpiib>). Fixing it to the taskbar is recommended.
- **IMPORTANT:** read the manual of the corresponding tool (RDFShape, Shumlex or 3DShEx).

Steps to follow

1. Open the link to the tool:
 - a. RDFShape: <https://rdfshape.weso.es/shexInfo>
 - b. Shumlex: <http://www.weso.es/shumlex>
 - c. 3DShEx: <http://www.weso.es/3dsheX/>
2. Open the questionnaire: <https://forms.office.com/r/e6pHXrsr6E>
3. Complete the first part (*Preliminary Questionnaire*) and move on to the next part.
4. In the test cases, visualize the schema.
5. **For each question** in a test case, do the following:
 - a. Click on the *Task Timer* extension icon.
 - b. Create a new task with the number of the question to be answered (*Enter a new task name...*). Creating a task **does not** start the counter.
 - c. Start the task counter (*Play* icon) when the question is to be answered. *E.g., if the name of a shape is requested, start the counter when beginning the search on the generated diagram.*
 - d. Stop the counter when you have the solution (*Pause* icon) and answer in the form. Do not touch this task again.

6. Answer the last part of the form and submit it.
7. Take a screenshot of all measurements in the Task Timer and send it to UO258524@uniovi.es.
